Your patient has completed a weight loss consultation with MedExpress and we have provided them with Mounjaro® Injection 2.5 mg (Weeks 1–4). They have provided us with the following measurement: BMI 38.82 (height 170 cm; weight 112.2 kg).

They have advised us they are registered to your surgery and have none of the exclusion conditions listed in our screening questionnaire. If you are aware the information they have provided may be inaccurate we would greatly appreciate it if you could contact us. Please note we are not asking for specific information from their medical record or your opinion on suitability of treatment; the responsibility to treat remains entirely with us and our prescribers.

Yours sincerely,
